DOGA can develop for YOU !!

motores a medida

Los motores y motorreductores de corriente continua DOGA de este catálogo han sido desarrollados por nuestros ingenieros para lograr una adaptación óptima a las necesidades del cliente en todo tipo de aplicaciones, en el sector automóvil o en el sector industrial.

En DOGA somos especialistas en adaptar nuestros productos "estándar" a los requerimientos del cliente: desde un conector especial, un eje a medida, un bobinado que ajuste las prestaciones del motor, hasta el diseño de un motor completamente nuevo.

DOGA también está integrando ECU (Unidad de Control Electrónico) en sus motores para permitir a sus clientes lograr un control preciso de su aplicación.

Nuestra misión es la de desarrollar motores y motorreductores de corriente continua a medida y hasta 72 V, para satisfacer las necesidades particulares de nuestros clientes.

motores especiales

DOGA ofrece a sus clientes su tecnología y experiencia en la fabricación de motores y motorreductores de corriente continua, para desarrollar soluciones específicas que requieran una motorización en corriente continua y en baja tensión, hasta 72 V, en tecnología de imanes permanentes, con carbones o tecnología brushless.

moteurs sur mesure

Les moteurs et motoréducteurs à courant continu DOGA de ce catalogue ont été conçus par nos ingénieurs pour une adaptation optimale aux besoins du client et pour tout type d'application, tant pour le secteur automobile que pour l'industrie en général.

Chez Doga nous sommes spécialistes dans l'adaptation de produits "standard" aux nécessités du client. Des un connecteur spécial, l'axe à dimension spéciale ou l'induit pour ajuster les capacités du moteur, jusqu'à la conception totale d'un nouveau moteur.

DOGA intègre l'ECU (Unité de Commande Électronique) dans ses moteurs permettant un contrôle précis à ses clients.

Notre mission est de développer des moteurs et motoréducteurs à courant continu sur mesure, et jusqu'à 72V, pour satisfaire les besoins de nos clients.

moteurs spécialement conçus

DOGA offre à ses clients sa technologie et expérience dans la fabrication de moteurs et motoréducteurs c.c., afin de développer des solutions spécifiques demandant une motorisation à courant continu et de basse tension jusqu'à 72V, tant avec une technologie a aimants permanents qu'avec ou sans charbons (brushless).

customized motors

The DOGA DC motors and gearmotors in this catalog have been developed by our engineers to obtain an optimal adaptation to the needs of the client for all type of applications which come from a variety of industries.

At DOGA, we are specialized in adapting our "standard" products to meet the requirements of our customers. From a special connector or shaft, a selected winding that fits the specification of the motor, to even a brand new design of motor. DOGA does them all.

Also, DOGA is integrating ECU (Electronic Control Unit) in our motors to allow our customers for a precise control.

Our mission is to develop customized DC motors and gearmotors, up to 72 V, to satisfy the needs of our clients.

special motors

DOGA offers their technology and experience in the manufacture of DC motors and gearmotors, to develop specific solutions that operate on DC voltages to 72 Volts, using permanent magnet technology, both Brush type (PMDC) and Brushless (BLDC).

Kundenspezifisch

Die Gleichstrommotoren mit und ohne Getriebe in diesem Katalog sind von unseren Technikern entwickelt worden, um die beste Anpassung an die Kundenanforderungen zu erzielen, für jede Art von Anwendung, sei es im Automotivebereich, sei es in der übrigen Industrie.

Wir bei Doga sind Spezialisten darin, unsere "Standardmodelle" an die Anforderungen des Kunden anzupassen. Seien es eine besondere Steckverbindung oder ein besonderes Wellenende, eine Wicklung, die den Wirkungsgrad des Motors verfeinert bis hin zu einem vollständigen neuen Design.

DOGA ist die Integration von ECU (Electronic Control Unit) in unsere Motoren erlauben unseren Kunden für eine präzise Steuerung.

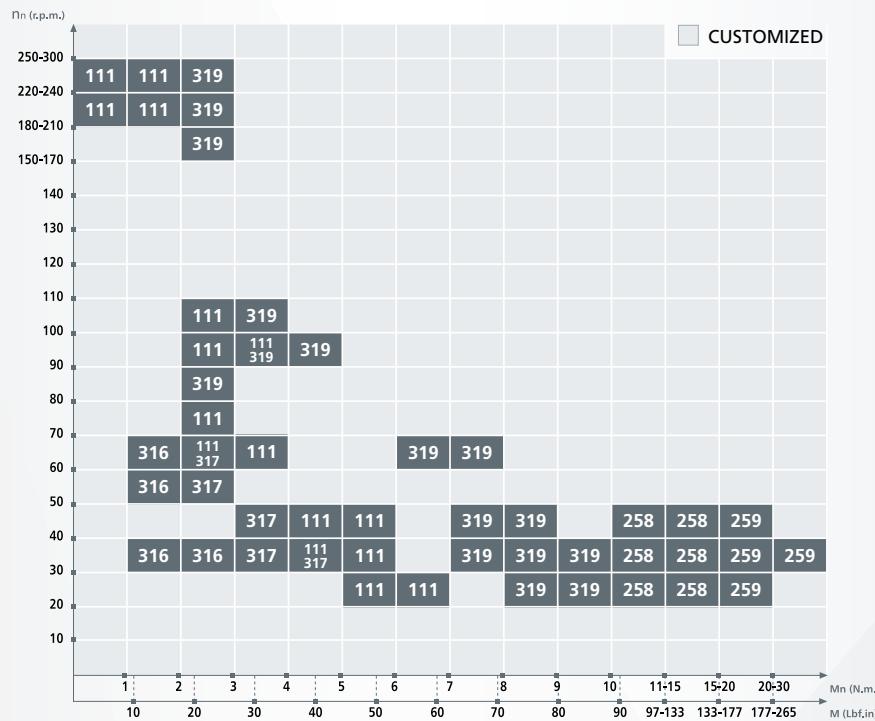

Wir sehen es als unsere Aufgabe an, Gleichstrommotoren mit und ohne Getriebe kundenspezifisch zu entwerfen, bis zu 72V Spannung, um die Bedürfnisse unserer Kunden zu erfüllen.

Spezialmotoren

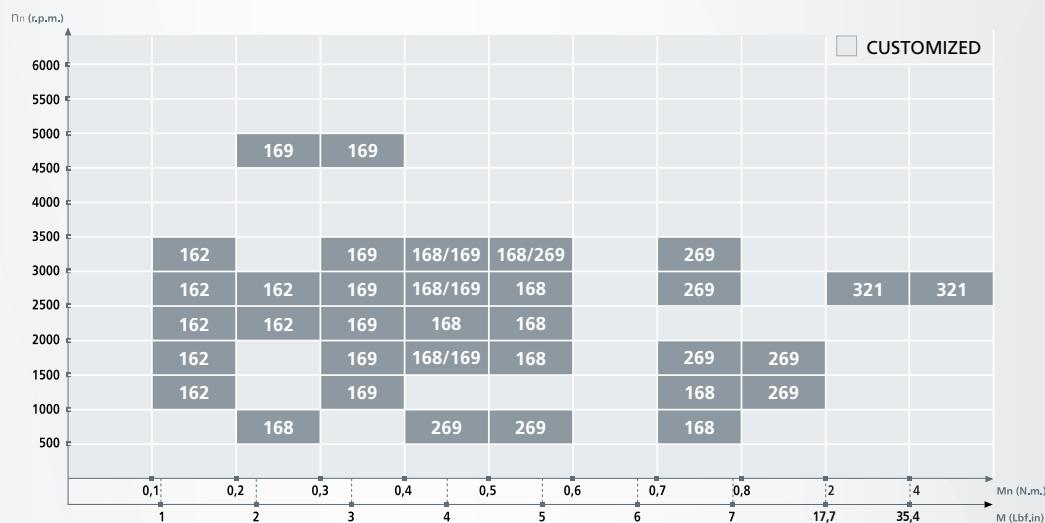

DOGA bietet seinen Kunden Technologie und Erfahrung bei der Herstellung von Gleichstrommotoren mit und ohne Getriebe an, um spezifische Lösungen zu finden, die eines Gleichstromantriebs im Niedrigspannungsreich bis zu 72 V bedürfen, in Permanentmagnettechnik ebenso wie in bürstenlosen Technik.

características de las curvas characteristic curves caractéristiques des courbes Leistungskurven

márgenes de tolerancia tolerance zones marges de tolerance Toleranzbereiche

Los valores de bloqueo (M_a , I_a) corresponden al par y la corriente del motor en frío con el eje de salida bloqueado.

Los valores nominales (U_n , I_n , M_n , n) están determinados para funcionamiento continuo (S1-VDE0530) a condiciones ambientales normales. Tolerancia $\pm 10\%$.

Las curvas son con el motor en frío.

Les valeurs de blocage (M_a , I_a) correspondent au couple du moteur à froid avec axe de sortie bloqué.

Les valeurs nominales (U_n , I_n , M_n , n) sont déterminées pour un fonctionnement continu (S1-VDE0530) en conditions ambiantes normales. Tolérance $\pm 10\%$.

Les courbes sont avec moteur froid.

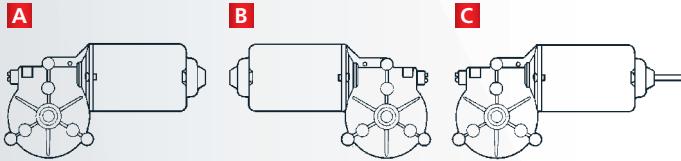

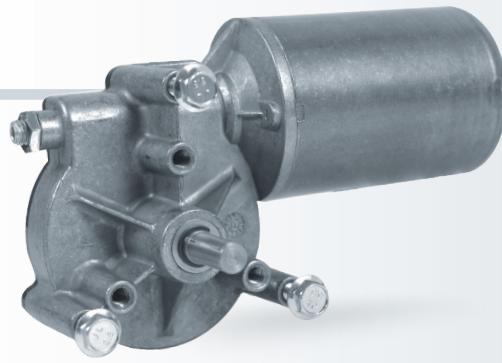

The stall values of starting torque (M_a) and starting current (I_a) in this catalog correspond to the torque and the current of the motor at room temperature with the output shaft locked.

The nominal values for voltage (U_n), current (I_n), torque (M_n) and speed (n) are for continuous operation (S1-VDE0530) in normal ambient conditions. The tolerance is $\pm 10\%$ for all values shown unless otherwise noted. Performance curves are with the motor at 20 degrees C temperature.

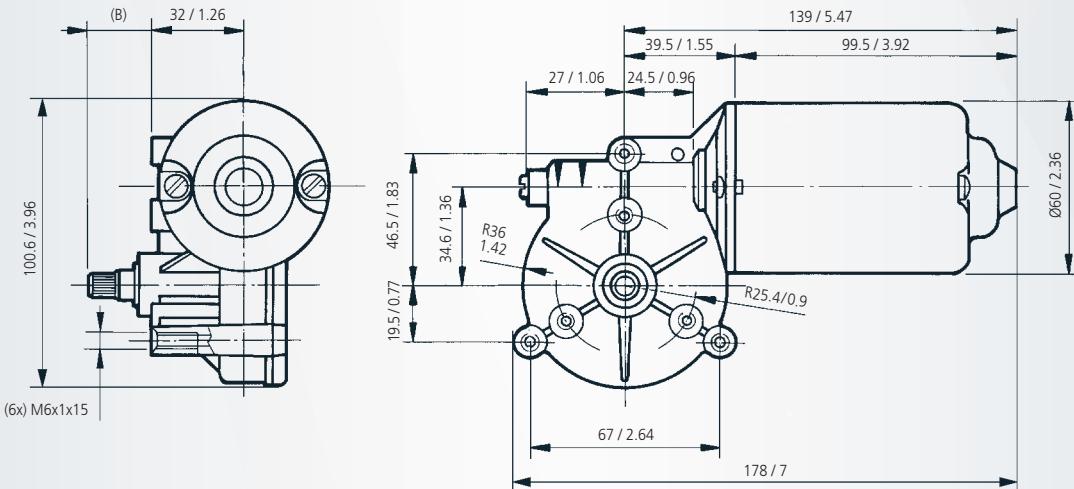

Die Werte für die Anlaufstrom und der Anzugsdrehmoment (M_a , I_a) entsprechen dem Drehmoment und der Strom des Motors in kaltem Zustand mit blockierter Abgangswelle.

Die Nominalwerte (U_n , I_n , M_n , n) werden ermittelt bei Dauerbetrieb (S1-VDE0530) unter normalen Umgebungsbedingungen. Toleranz $\pm 10\%$.

Die Kurven beziehen sich auf den Motor in kaltem Zustand.

CURVAS CURVES COURBES KURVEN

DOGA ha diseñado una Unidad de Control Electrónico, ECU embebida, para la serie de motores 319 (versión estándard y versión más corta 319H), la cual permite a los clientes, en un motor compacto, robusto y de coste contenido, lograr un control en lazo cerrado de cada aplicación.

Este concepto está ya implementado en varios proyectos, actualmente en producción, y puede ser implementado en proyectos particulares desarrollando un software específico.

INTERFACES

Digital inputs | LIN | CAN J1939 | CAN Open

CARACTERÍSTICAS

- ⇒ Motor compacto con controlador integrado
- ⇒ Voltaje adaptable: 12 o 24V
- ⇒ Control de velocidad muy exacto
- ⇒ Sincronización de varios motores
- ⇒ Suave movimiento en inversión de giro
- ⇒ IP hasta IP69k
- ⇒ Un sistema para múltiples necesidades
- ⇒ Retroalimentación del estado del motor
- ⇒ Permite la integración de varios motores en una línea (LIN-CAN)
- ⇒ Capacidad de rotación del motor en ambos sentidos

En DOGA, diseñamos nuestros motores para encajar perfectamente en cualquier proyecto. Un motor para cada aplicación.

DOGA a conçu embarqué ECU (Unité de Commande Électronique) pour la série 319 (le 319 standard et la version courte le 319H) qui permet aux clients d'un contrôle de boucle fermée dans chaque application sur un moteur très compact et robuste avec un coût contenu.

Ce concept a déjà été mis en place dans plusieurs projets, maintenant en production de séries, et peut être implémenté dans certains projets en mettant au point un logiciel dédié.

INTERFACES

Entrées numériques | LIN | CAN J1939 | CAN Open

CARACTÉRISTIQUES

- ⇒ Moteur compact avec unité de commande électronique intégré
- ⇒ Personnalisation de système en tension : 12 ou 24V
- ⇒ Contrôle de la vitesse très précise
- ⇒ Synchronisation de plusieurs moteurs
- ⇒ Mouvement souple au cours de l'inversion de la rotation
- ⇒ IP jusqu'à IP69k
- ⇒ Système pour plusieurs besoins
- ⇒ Rétroaction du moteur
- ⇒ Intégration permet des multiples moteurs dans un seul réseau (LIN-CAN)
- ⇒ Capacité pour faire tourner le moteur dans les deux sens

Chez DOGA, nous personnalisons pour s'adapter parfaitement à tout projet. Un moteur pour chaque application.

DOGA has designed embedded ECU (Electronic Control Unit) for the 319 series (319 standard and the shorter version 319H) which makes it possible for our customers, in a very compact and robust motor with a contained cost, to have a close loop control on each application.

This concept has, in several projects, already been implemented in series production, and can be implemented in particular projects by developing a specific software.

INTERFACES

Digital inputs | LIN | CAN J1939 | CAN Open

FEATURES

- ⇒ Compact motor with integrated driver
- ⇒ Voltage system customization: 12 or 24V
- ⇒ Very accurate speed control
- ⇒ Synchronization of several motors
- ⇒ Smooth motion during reversal of the rotation
- ⇒ IP up to 69k
- ⇒ One system of multiple needs
- ⇒ Motor status feedback
- ⇒ Allows integration of multiple motors in one network (LIN-CAN)
- ⇒ Capability to rotate the motor in both senses

At DOGA, we design our motors to perfectly fit in any project. One motor for each application.

DOGA hat für die Baureihe 319 (Standard 319 und die kürzere Variante 319H) eine eingebettete elektronische Steuerung (ECU) entwickelt, was eine Closed-loop Steuerung in einem sehr kompakten, robusten und günstigen Motor für beliebige Anwendungen ermöglicht. Die Kenndaten und möglichen Schnittstellen sind nachfolgend aufgeführt.

Dieses Konzept wurde bereits in mehreren Projekten in Serienfertigung umgesetzt. Spezielle Kundenanforderungen sind durch projektspezifische Programmierung möglich.

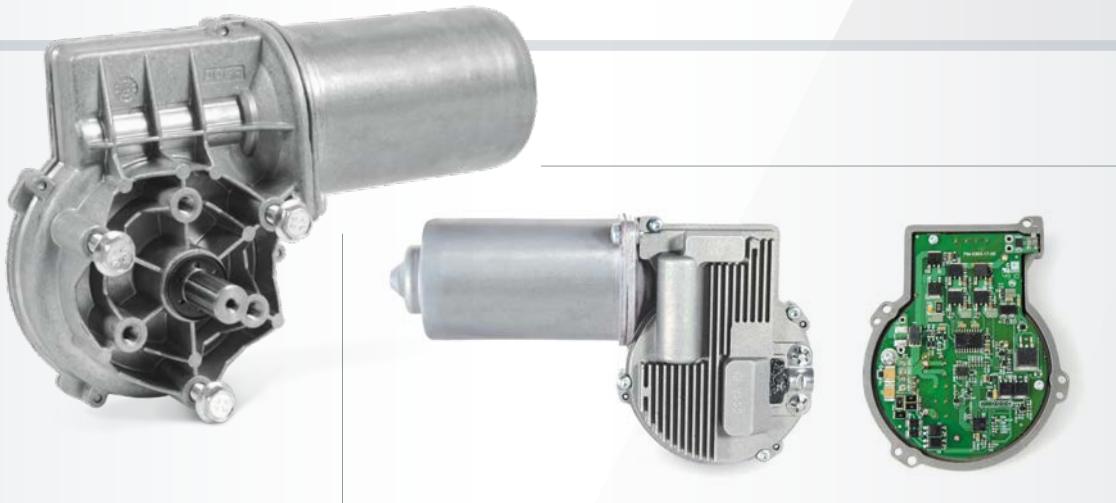

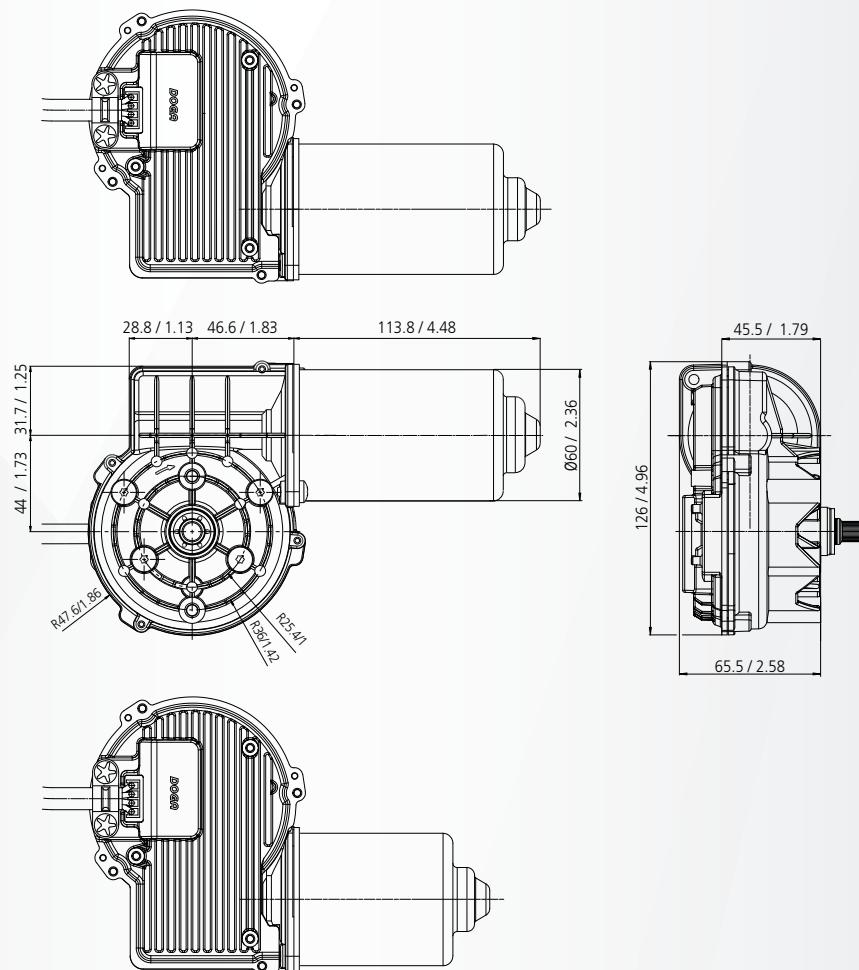

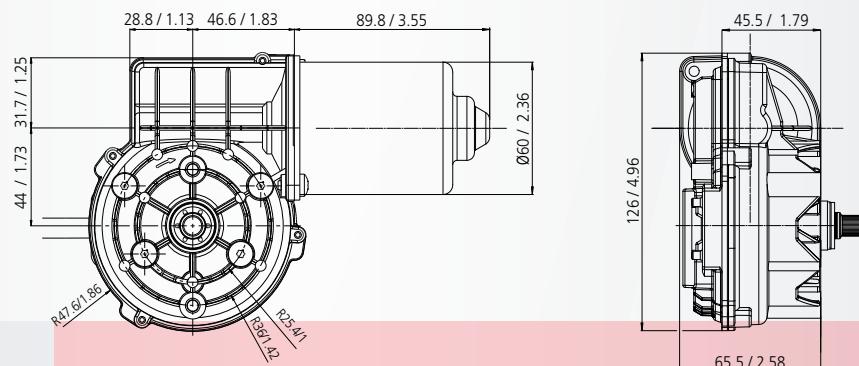

SCHNITTSTELLEN

Digitale Eingänge | LIN | CAN J1939 | CAN Open

FUNKTIONEN

- ⇒ Kompakter Motor mit integrierter Steuerung
- ⇒ Nennspannung : 12 oder 24V
- ⇒ Sehr exakte Geschwindigkeitssteuerung
- ⇒ Synchronisation von mehreren Motoren
- ⇒ Ruckfreie Bewegung bei Drehrichtungsänderung
- ⇒ IP-Schutzklasse bis IP69k
- ⇒ Ein System für mehrere Bedürfnisse
- ⇒ Diagnosefunktion
- ⇒ Ermöglicht Integration von mehreren Motoren in einem Netzwerk (LIN-CAN)
- ⇒ Reversierbetrieb

DOGA Motoren können spezifisch auf Kundenprojekte appliziert werden um eine perfekte Integration zu ermöglichen.

(1) En cada serie de motores disponemos de distintas combinaciones de potencia. Ver hojas de características de los motores en el este catálogo.

(2) La capacidad de par será precisado para cada combinación de motor y redactor y aplicación. Los valores están indicados para 1, 2 o 3 etapas respectivamente. En ciertas condiciones los pares indicados pueden ser excedidos.

(3) Valores aproximados para cada nº de etapas de reducción.

(1) Dans chaque série de moteurs nous offrons différentes puissances. Voir page de caractéristiques des moteurs.

(2) La capacité de couple sera définie pour chaque combinaison de moteur et réducteur ainsi que pour chaque application. Les valeurs sont indiquées pour 1, 2 et 3 étages respectivement. Dans certaines conditions de fonctionnement les valeurs de couple indiquées peuvent être excédées.

(3) Valeurs approximatives pour chaque n° d'étages.

(1) In each motor series we have different power configurations. Here we show one of them. See motor catalogue for others

(2) The Torque capacity will be precisely defined for each motor and gear combination and for each application. Values indicated per 1, 2 & 3 stages respectively. In certain conditions the mentioned torque can be exceeded.

(3) Approximate values for each nr. of stages combination.

(1) Für jede Motorreihe gibt es verschiedene Leistungsvarianten. Hier zeigen wir einige von diesen, für andere Sehen Sie die Motorsektion des Katalogs.

(2) Das Drehmoment wird genau definiert für jede Motor- und Getriebekombination und für jede Anwendung. Werte für jeweils 1, 2 und 3 Stufen. Unter manche Bedingungen kann das erwähnte Drehmoment überschritten werden.

(3) Näherungswerte für jede Stufenkombination.
